Instant mobile homes, practical and comfortable, for singles and families; plumbed and wired, with multiple optional extras.

SPEEDSPAN

PORTABLE MODULAR PREFAB UNITS ARE THE SOLUTION WHEN YOU NEED MORE ACCOMMODATION ON SITE

Expandable office space clad in prepainted steel or maintenance-free brick finish. Total flexibility, with sections easily deliverable to any site.

GENERAL CONSTRUCTION

Units are 6, 9, 12, 15 & 18m in length:

Full-length, full-width structurally welded steel chassis lipped-channel, longitudinal beams and outriggers

The complete assembly is sandblasted and coated with self-etch red oxide primer. For added protection, the chassis is coated with a waterproof, malleable compound called Plaswax or similar which forms a tenacious wax-like surfacing.

PARKHOMES

ADAPTABLE, FLEXIBLE, VERSATILE. ANYWHERE, EVERYWHERE.

We're solution-driven and that means whatever your needs, our easy-to-install UfuduCabins are the quick, easy, versatile and reliable answer.

From rural schools to clinics to a mining or exploration site, a suite of UfuduCabins comes complete with all amenities including sleeping, storage, eating, laundry, ablution and recreational facilities. And, you have the option to purchase or rent at competitive rates.

As freight costs into Africa can be prohibitively expensive, we transport collapsed units which we erect on site to your requirements.

EASY-TO-INSTALL ACCOMMODATION SOLUTIONS

Once our cabins reach their destination, they are easy to unpack, erect and commission with speed and accuracy. All assembly can be done on site with standard tools. Each of our cabins can be erected on virtually any surface because we provide adjustable base jacks inside our kits.

This system allows the end-user to join multiple units, even if the ground is uneven or not level. What's more, should any cabin panel or other component be damaged, it is easy to replace because of the simple, modular designs we use.

As a significant benefit, our collapsible and easily transportable UfuduCabins can save our customers and end-users up to 75% on freight charges. This means our flat-pack system yields significant total cost savings, particularly when an affordable space management solution is needed in a remote area.

Each of our UfuduCabins can be erected on virtually any surface, because we provide adjustable base jacks inside our kits.

The UfuduCabin system allows the end-user to join multiple units of mobile homes, offices or storage, even if the ground is uneven or not level. What's more, should any UfuduCabins panel or other component be damaged, it is easy to replace because of the simple, modular designs we use.

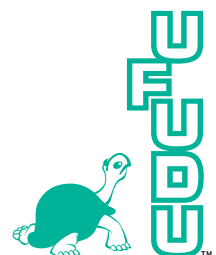

From flatpack to erected cabin in 3-4 hours

UFUDUCABINS

The modular superstructures are designed to allow units to be joined and stacked for an unlimited range of configurations.

TOUGH, DEPENDABLE, STRONG-AS-STEEL STORAGE SOLUTIONS.

Speedspace offer a comprehensive range of general purpose ISO dry-freight and refrigerated cargo containers, ideal for perishable cargo, is available in a wide choice of sizes and designs.

Affordable and easy-to-use, our product and service excellence extends to the supply and support of affordable and easy-to-use sturdy steel containers.

Our steel containers are ideal for standard and non-standard storage and shipping, as well as converted units for a wide range of accommodation and workplace requirements.

Customers have the option to rent or purchase at attractive and competitive rates. Our low-maintenance, impact-resistant, weatherproof, safe and secure steel container units are easy to transport, with an extensive range of conversion options, from site office, mobile workshops, ablution facilities and many more.

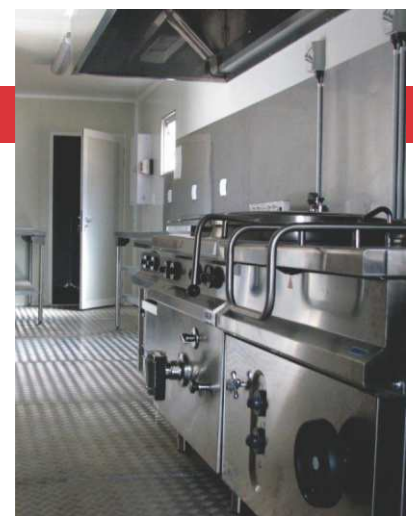

We are able to supply and support a comprehensive range of affordable, easy-to-use and robust steel containers that can be used for standard and non-standard storage and shipping requirements, as well as converted units for a broad spectrum of accommodation and workplace requirements.

A COST-EFFECTIVE MODULAR PREFAB PANEL SYSTEM, IDEAL FOR UNITS INTENDED FOR LONG-TERM USE ON SITE

This prefab modular system is portable, and easily transported, even to remote areas, and is erected on site, on either a concrete slab foundation or a factory-manufactured, suspended floor.

The modular panel system is suitable for most types of accommodation, including: ablutions, dormitories, kitchens, schools, clinics, houses or modular site offices (including large on-site complexes), and can be customised to suit our clients requirements. Frost-white walls and high-quality finishings complete the stylish look of the Speedplan modular panel system.

GENERAL

- The system has been designed to be erected on either a concrete raft foundation slab or factory manufactured suspended floor
- The width of the system increases in multiples of 1 160 mm.
- 15° roof pitch
- Floor-to-ceiling height 2 400 mm as standard (2 700 mm as optional)
- The 1 160 mm panel width reduces site erection time and allows for the factory fitting of components that would otherwise have to be fitted on site
- Up to 100m² building can be containerised (six metre container) for transport purposes
- The layout of the building is planned and designed in consultation with the client and according to the requirements of the client.

SPEEDPLAN

Durable, adaptable building system comprising prefabricated panels assembled on-site on a concrete foundation
